Welcome to Anglian Water's Education Centre at Chelmsford Sewage Treatment Works...

want to bring your children's learning to life?

Let your class experience the sights, sounds and smells of a sewage works. Built at the turn of the twentieth century, the Chelmsford works has been treating wastewater from the town of Chelmsford and the surrounding area for more than 100 years.

activities include:

- an overview of the water cycle
- a look at water in the local area
- an explanation of sewage and wastewater and how it is treated
- a guided tour of the treatment works
- a look into the hidden world of micro-organisms
- a chance to investigate the use of filtration to help clean wastewater.

What's more, we can work with you to plan lessons to meet specific needs. We're always developing new activities - to find out what's available please contact the Education Centre Manager.

The latest addition to the site is a purpose-built Education Centre, created to provide an exciting range of activities and hands-on experiences for primary school children. It is hoped a visit will increase their understanding of the water cycle and the role that Anglian Water plays within it.

With lessons led by a qualified teacher, in a fully-equipped classroom, the Centre offers an opportunity to deliver science and geography units of the National Curriculum.
